# Study & Evaluation Scheme Study Summary

Name of the Faculty	Faculty of Agricultural Studies
Name of the Schoolf	Quantum School of Agricultural Studies
Name of the Department	Department of Agricultural Studies
Program Name	Bachelor of Science (Hons) in Agriculture
Duration	4 Years
Medium	English

# **Evaluation Scheme**

Type of Papers	Internal Evaluation (%)	End Semester Evaluation (%)	Total (%)				
Theory	40	60	100				
Practical/ Dissertations/Project Report/ Viva-Voce	40	60	100				
Internal Evaluati	on Components	(Theory Paners)					
Sessional Examination I	 	50 Marks					
Sessional Examination II		50 Marks					
Assignment –I		25 Marks					
Assignment-II	25 Marks						
Attendance		50 Marks					
	n Components (Practical Papers)						
Quiz One	25 Marks						
Quiz Two		25 Marks					
Quiz Three		25 Marks					
Lab Records/ Mini Project	75 Marks						
Attendance		50 Marks					
End Semester	Evaluation (Pra	ictical Papers)					
ESE Quiz	30 Marks						
ESE Practical Examination	50 Marks						
Viva- Voce	20 Marks						

# **Structure of Question Paper (ESE Theory Paper)**

The question paper will consist of 5 questions, one from each unit. Student has to Attempt all questions. All questions carry 20 marks each. Parts a) and b) of question Q1 to Q5 will be compulsory and each part carries 2 marks. Parts c), d) and e) of Q1 to Q5 Carry 8 marks each and the student may attempt any 2 parts.

# **Important Note:**

- 1.The purpose of examination should be to assess the Course Outcomes (CO) that will ultimately lead to attainment of Programme Outcomes (PO). A question paper must assess the following aspects of learning planned for specific course i.e. Remember, Understand, Apply, Analyze, Evaluate & Create (reference to Bloom's Taxonomy). The standard of question paper will be based onmapped BL level complexity of the unit of the syllabus, which is the basis of CO attainment model adopted in the university.
- 2. Case Study is essential in every question paper (wherever it is being taught as a part of pedagogy) for evaluating higher-order learning. Not all the courses might have case teaching method used as pedagogy.
- 3. There shall be continuous evaluation of the student and there will be a provision of real time reporting on QUMS. All the assignments will evaluated through module available on ERP for time and access management of the class.

# Program Structure - Bachelor of Science (Hons) in Agriculture

### Introduction

Bachelor of Science (Hons) in Agriculture syllabus is broad and multidisciplinary consists of various courses in Agronomy, Horticulture, Plant Pathology, Entomology, Agricultural Economics, Extension Education, Genetics and Plant Breeding, Soil Science, Animal Husbandry apart from supporting courses in Basic Sciences, Humanities, and Agricultural Engineering.

The Bachelor of Science (Hons) in Agriculture subjects are designed in such a way that students grasp all the knowledge related to agriculture and environmental science. Towards enhancing employability and entrepreneurial ability of the graduates the Quantum University increase the practical content in the courses wherever necessary. The total number of credit hours in 8 semesters including Student READY programme will be more than 170 for all the programmes.

In order to harness regional specialties and to meet region-specific needs the Quantum University modify the content of syllabus as per the regional demands and needsThe Quantum university offering the specializations like majoring in Animal Science, Plant Protection, Soil Science, Genetics and Breeding or Agricultural Engineering.

**Bridge Courses:** In Agriculture students from both the background Medical and Non-medical are eligible to apply. Therefore we have the provision of bridge courses to fulfill the gap between Biology and Mathematics. Bridge Course helps students to make a successful transition into their new academic programs by providing them with the necessary background knowledge about the topics that will be covered in their new courses. In addition, Bridge Courses can also help students to develop the skills and abilities that they need to succeed in their new academic programs

Rural Agricultural Work Experience (RAWE) and Agro-Industrial Attachment (AIA): This program will be undertaken by the students during the seventh semester for a total duration of 20 weeks with a weightage of 0+20 credit hours in two parts, namely, RAWE and AIA. It will consist of general orientation and on-campus training by different faculties followed by village attachment/unit attachment in university/ college/ KVK or a research station. The students would be attached with the agro-industries to get an experience of the industrial environment and working. Due weightage in terms of credit hours will be given depending upon the duration of stay of students in villages/agro-industries. At the end of RAWE/AIA, the students will be given one week for project report preparation, presentation and evaluation.

The students would be required to record their observations in field and agro-industries on daily basis and will prepare their project report based on these observations.

### Experiential Learning Programme (ELP)/ Hands On Training (HOT)

This program will be undertaken by the students preferably during the eighth semester for a total duration of 24 weeks with a weightage of 0+20 credit hours. The students will register for any of two modules, listed below, of 0+10 credit hours each.

- Production Technology Bio-agents and Bio-fertilizer
- Seed Production and Technology
- Mushroom Cultivation Technology
- Soil, Plant, Water and Seed Testing
- Poultry Production Technology
- Hybrid Seed Production Technologies
- Floriculture and Landscaping
- Food Processing
- Commercial Horticulture
- Agriculture Waste Management
- Organic Production Technology

# Curriculum (18-22) Version 2018

### **B.** Choice Based Credit System (CBCS)

Choice Based Credit System (CBCS) is a versatile and flexible option for each student to achieve his target number of credits as specified by the UGC and adopted by our university.

The following is the course module designed for the B.Sc. (H) (Agricultural Studies) program:

**Core competency:** Students will acquire core competency in Agricultural Studies and in allied subject areas.

Program/Discipline Specific Elective Course (DSEC):

**Skilled communicator:** The course curriculum incorporates basics and advanced training in order to make a graduate student capable of expressing the subject through technical writing as well as through oral presentation.

Critical thinker and problem solver: The course curriculum also includes components that can be helpful to graduate students to develop critical thinking ability by way of solving problems/numerical using basic &advance knowledge and concepts of Agricultural Studies.

**Sense of inquiry:** It is expected that the course curriculum will develop an inquisitive characteristic among the students through appropriate questions, planning and reporting experimental investigation.

**Skilled project manager:** The course curriculum has been designed in such a manner as to enabling a graduate student to become a skilled project manager by acquiring knowledge about mathematical project management, writing, planning, study of ethical standards and rules and regulations pertaining to scientific project operation.

**Ethical awareness/reasoning:**A graduate student requires understanding and developing ethical awareness/reasoning which the course curriculums adequately provide.

**Lifelong learner:** The course curriculum is designed to inculcate a habit of learning continuously through use of advanced ICT technique and other available techniques/books/journals for personal academic growth as well as for increasing employability opportunity.

Value Added Programme (VAP): A value added audit course is a non-credit course which is basically meant to enhance general ability of students in areas like soft skills, quantitative aptitude and reasoning ability - required for the overall development of a student and at the same time crucial for industry/corporate demands and requirements. The student possessing these skills will definitely develop acumen to perform well during the recruitment process of any premier organization and will have the desired confidence to face the interview. Moreover, these skills are also essential in day-to-day life of the corporate world. The aim is to nurture every student for making effective communication, developing aptitude and a general reasoning ability for a better performance, as desired in corporate world. There shall be four courses of Aptitude in Semester I, II, III&IV semesters and two courses of Soft Skills in III&IV Semesters and will carry no credit, however, it will be compulsory for every student to pass these courses with minimum

45% marks to be eligible for the certificate. These marks will not be included in the calculation of CGPI. Students have to specifically be registered in the specific course of the respective semesters.

**Skill Enhancement Course:** This course may be chosen from a pool of courses designed to provide value-based and/or skill-based knowledge.

**Generic/Open Elective Course (OEC):** Open Elective is an interdisciplinary additional subject that is compulsory in a program. The score of Open Elective is counted in the overall aggregate marks under Choice Based Credit System (CBCS). Each Open Elective paper will be of 3 Credits in III, IV and VI semesters. Each student has to take Open/Generic Electives from department other than the parent department. Core / Discipline Specific Electives will not be offered as Open Electives.

**Non-CGPA Audit Course (NCAC):** This is a compulsory course but audit that does not have any choice and will be of 2 credits. Each student of B.Sc. (H). Program has to compulsorily pass the Environmental Studies and Human values & professional Ethics and NSS.

## C. Program Outcomes of Bachelor of Science (Hons) in Agriculture

PO-01	Agricultural knowledge	Imparting the knowledge of agriculture and allied sciences related subjects in the current scenario of Agriculture.
PO-02	Problem analysis	Develop the skills to manage agricultural farms, improve quality of farm produces and their commercial utilization.
PO-03	Development of Solutions	Design solutions for complex problems of the farming system with due consideration of public health and environmental safety.
PO-04	Conduct surveys and investigations	Explore knowledge and methods to synthesize and interpret available information to make viable conclusions.
PO-05	Modern tool usage	Select, and apply appropriate techniques, resources, and modern agriculture technologies and tools for agricultural activities with an understanding of the limitations.
PO-06	Society Role	Apply reasoning to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional practices in agriculture.
PO-07	Environment and sustainability	Understand the impact of the professional scientific solutions on societal and environmental issues, and impart knowledge and need for sustainable development.
PO-08	Ethics	Apply ethical principles and commit to professional ethics and responsibilities and norms of the agricultural practices.
PO-09	Individual and Team work	Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO-10	Communication	Communicate effectively through concise documents on complex agricultural problems and challenges in Agriculture.
PO-11	Project Management and Finance	Impart knowledge and understand all related methods in agriculture to apply it in one's work individually or in a team to manage projects and increase the profit from crop fields and livestock.
PO-12	Life-long learning	Recognize the need for, and have the preparation and ability to engage independently in life-long learning in the broadest context of agricultural and technological changes.

## **D. Program Specific Outcomes:**

**PSO1:** Ability to analyze and apply agricultural knowledge for proposing solutions to real world problems through incubation of innovative ideas in the agricultural field.

**PSO2:** To understand modern management and production techniques to resolve the agricultural issues based on societal and environmental perspective

# E. Program Educational Objectives (PEO's)

**PEO1.** To understand and be acquainted with several aspects in the field of agriculture to lead a successful career in industry or as an entrepreneur or to pursue higher education.

**PEO2.** To develop the ability to provide solutions for complex issues in agriculture using advance technologies with sustainability.

**PEO3.** To install lifelong learning approach constantly evolving technologies with innovative and ethical mindset.

### F. Pedagogy & Unique practices adopted:

"Pedagogy is the method and practice of teaching, especially for teaching an academic subject or theoretical concept". In addition to conventional time-tested lecture method, the institute will emphasize on experiential learning:

Role Play & Simulation: Role- play and simulation are forms of experiential learning. Learners take on different roles, assuming a profile of a character or personality, and interact and participate in diverse and complex learning settings. Role-play and simulation function as learning tools for teams and groups or individuals as they "play" online or face-to-face. They alter the power ratios in teaching and learning relationships between students and educators, as students learn through their explorations and the viewpoints of the character or personality they are articulating in the environment. This student-centered space can enable learner-oriented assessment, where the design of the task is created for active student learning. Therefore, role-play& simulation exercises such as virtual share trading, marketing simulation etc. are being promoted for the practical-based experiential learning of our students.

Video Based Learning (VBL)&Learning through Movies (LTM): These days technology has taken a front seat and classrooms are well equipped with equipment and gadgets. Video-based learning has become an indispensable part of learning. Similarly, students can learn various concepts through movies. In fact, many teachers give examples from movies during their discourses. Making students learn few important theoretical concepts through VBL & LTM is a good idea and method. The learning becomes really interesting and easy as videos add life to concepts and make the learning engaging and effective. Therefore, our institute is promoting VBL& LTM, wherever possible.

*Field/Live Projects:* The students, who take up experiential projects in companies, where senior executives with a stake in teaching guide them, drive the learning. All students are encouraged to do some live project other their regular classes.

*Industrial Visits:* Industrial visit are essential to give students hand-on exposure and experience of how things and processes work in industries. Our institute organizes such visits to enhance students' exposure to practical learning and work out for a report of such a visit relating to their specific topic, course or even domain.

MOOCs: Students may earn credits by passing MOOCs as decided by the college. Graduate level programs may award Honors degree provided students earn pre-requisite credits through MOOCs. University allows students to undertake additional subjects/course(s) (In-house offered by the university through collaborative efforts or courses in the open domain by various internationally recognized universities) and to earn additional credits on successful completion of the same. Each course will be approved in advance by the University following the standard procedure of approval and will be granted credits as per the approval. Keeping this in mind, University proposed and allowed a maximum of two credits to be allocated for each MOOC courses. In the pilot phase it is proposed that a student undertaking and successfully completing a MOOC course through only NPTEL could be given 2 credits for each MOOC course.

For smooth functioning and monitoring of the scheme the following shall be the guidelines for MOOC courses, Addon courses carried out by the College from time to time.

- a) It will necessary for every student to take at least one MOOC Course throughout the programme.
- b) There shall be a MOOC co-ordination committee in the College with a faculty at the level of Professor heading the committee and all Heads of the Department being members of the Committee.
- c) The Committee will list out courses to be offered during the semester, which could be requested by the department or the students and after deliberating on all courses finalize a list of courses to be offered with 2 credits defined for each course and the mode of credit consideration of the student. The complete process shall be obtained by the College before end of June and end of December for Odd and Even semester respectively of the year in which the course is being offered. In case of MOOC course, the approval will be valid only for the semester on offer.
- d) Students will register for the course and the details of the students enrolling under the coursealong with the approval of the Vice Chancellor will be forwarded to the Examination department within fifteen days of start of the semester by the Coordinator MOOC through the Principal of the College.
- e) After completion of MOOC course, Student will submit the photo copy of Completioncertificate of MOOC Course to the Examination cell as proof.
- f) Marks will be considered which is mentioned on Completion certificate of MOOC Course.
- g) College will consider the credits only in case a student fails to secure minimum required credits then the additional subject(s) shall be counted for calculating the minimum credits required for the award of degree.

Special Guest Lectures (SGL) &Extra Mural Lectures (EML): Some topics/concepts need extra attention and efforts as they either may be high in difficulty level or requires experts from specific industry/domain to make things/concepts clear for a better understanding from the perspective of the industry. Hence, to cater to the present needs of industry we organize such lectures, as part of lecture-series and invite prominent personalities from academia and industry from time to time to deliver their vital inputs and insights.

Student Development Programs (SDP): Harnessing and developing the right talent for the right industry an overall development of a student is required. Apart from the curriculum teaching various student development programs (training programs) relating to soft skills, interview skills, SAP, Advanced excel training etc. that may be required as per the need of the student and industry trends, are conducted across the whole program. Participation in such programs is solicited through volunteering and consensus.

*Industry Focused programmes:* Establishing collaborations with various industry partners to deliver the programme on sharing basis. The specific courses are to be delivered by industry experts to provide practice-based insight to the students.

Special assistance program for slow learners & fast learners: write the note how would you identify slow learners, develop the mechanism to correcting knowledge gap. Terms of advance topics what learning challenging it will be provided to the fast learners.

*Induction program:* Every year 3 weeks induction program is organized for 1st year students and senior students to make them familiarize with the entire academic environment of university including Curriculum, Classrooms, Labs, Faculty/ Staff members, Academic calendar and various activities.

Mentoring scheme: There is Mentor-Mentee system. One mentor lecture is provided per week in a class. Students can discuss their problems with mentor who is necessarily a teaching faculty. In this way, student's problems or issues can be identified and resolved.

Competitive exam preparation: Students are provided with one class in every week for GATE/ Competitive exams preparation.

Extra-curricular Activities: organizing& participation in extracurricular activities will be mandatory to help students develop confidence & face audience boldly. It brings out their leadership qualities along with planning & organizing skills. Students undertake various cultural, sports and other competitive activities within and outside then campus. This helps them build their wholesome personality.

Career & Personal Counseling: - Identifies the problem of student as early as possible and gives time to discuss their problems individually as well as with the parents. Counseling enables the students to focus on behavior and feelings with a goal to facilitate positive change. Its major role lies in giving: Advice, Help, Support, Tips, Assistance, and Guidance.

Participation in Flip Classes, Project based Learning(A2 Assignment), Workshops, Seminars & writing & Presenting Papers: Departments plan to organize the Flip Classes, Project based Learning(A2 Assignment), workshops, Seminars & Guest lecturers time to time on their respective topics as per academic calendar. Students must have to attend these programs. This participation would be count in the marks of general Discipline & General Proficiency which is the part of course scheme as non-credit course.

Formation of Student Clubs, Membership & Organizing & Participating events: Every department has the departmental clubs with the specific club's name. The entire student's activity would be performed by the club. One faculty would be the coordinator of the student clubs & students would be the members with different responsibility.

Capability Enhancement & Development Schemes: The Institute has these schemes to enhance the capability and holistic development of the students. Following measures/ initiatives are taken up from time to time for the same: Career Counseling, Soft skill development, Remedial Coaching, Bridge Course, Language Lab, Yoga and Meditation, Personal Counseling

Library Visit & Utilization of QLRC: Studentsmay visit the library from morning10 AM to evening 8 PM. Library created its resources Database and provided Online Public Access Catalogue (OPAC) through which users can be accessed from any of the computer connected in the LAN can know the status of the book. Now we are in process to move from OPAC to KOHA.

# Detailed Syllabus (Semester wise /course wise) SEMESTER 1 Year -1

	SEIVIESTER 1 TEAT -1	
AG3101	Title :- Introductory Biology	LTPC 1001
Version No.	1.0	
Course Prerequisites	Nil	
Objectives	This course aims to learn about the basic concepts of biology and its role in agriculture	
Unit Nos.	Unit Title	Number of hours (per Unit)
Unit 1	Introduction	2
Introduction to the	te living world, diversity and characteristics of life, origin of life, Evolution and Euger	nics.
Unit 2	Taxonomy	2
Binomial nomeno	elature.	
Unit 3	Cell	2
Cell and cell divi	sion.	
Unit 4	Flower and Seed	3
Morphology of fl	owing plants. Seed and seed germination.	
Unit 5	Plant systematic	3
Classification Pla	ant systematic- viz; Brassicaceae, Fabaceae and Poaceae. Role of animals in agricultur	e.
Text Books	K.N. Bhatia, M.P. Tyagi. Trueman's Elementary Biology. Mittal Books.     Mariëlle Hoefnagels. Biology: The Essentials. Attonbitus Pluo.	
Reference Books	<ol> <li>Paul R.Ehrlich.Introductory Biology.</li> <li>George Gaylord Simpson.Life: An Introduction to Biology. Harcourt CollegePub</li> </ol>	
Mode of Evaluation	Internal and External Examination	
Recommended by the Board of Studies on	31-03-2018	
Date of approval by the Academic Council	11.06.2018	

# **Course Outcome For AG3101**

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use, for more than One)
1 (01	Students will be learning how life has originated and evolved.	2	Emp
CO2	Students will be learning on classification of living things.	2	Emp
1 (.03	Students will be gaining knowledge on how a cell looks like and how do they divide.	3	S
CO4	Students will be learning about seed germination and flowering plants.	3	Ent
	Students will be learning about plant systematic and animals in agriculture	2	Emp

Objectives	To impart the knowledge of Statistical Techniques.	
Unit No.	Unit Title	No. of hours (per Unit)
Unit I	Introduction and presentation	4
ŕ	abulation, Graphic and Diagrammatic presentation of Data ,histogram and	d ogives,
Unit II	Measures of central tendency	4
	ncy: Mean, Median, Mode, Geometric Mean.	
Unit III	Measures of Dispersion	5
Range Method, Quartile Dev Skewness: Karl Pearson's C	viation, Mean Deviation, Standard Deviation, Coefficient of Variation. Moefficient of Skewness, Measure of Kurtosis.	easures of
Unit IV	Correlation and regression	5
Correlation: Karl Pearson's Analysis	Coefficient of Correlation, Spearman's rank Correlation Coefficient, Res	gression
Unit V	Probability	6
Bay's Theorem. Probability	Additive and Multiplicative Laws of probability and simple problems b Distribution: Binomial, Poisson and Normal	ased on them
Text Books	1. Gupta, S.P. Statistical Methods; S. Chand & Sons, New Delhi.

	Fitle: Introductory Agro-Meteorology & Climate Change	LTPC
V/ No. 1		
		2 0 0 2
	.0	
1 1	Nil	
	This course aims to learn the basic concepts of Agro meteorology and its	
	applications in agriculture and knowledge about climate change.	
Unit Nos.	Unit Title	Number of
		hours (per
Unit I	Introduction and Footh streambors	Unit)
	Introduction and Earth atmosphere	· ·
	ricultural meteorology; Earth atmosphere- its composition, extent and stru	icture;
	riables; Atmospheric pressure, its variation with height.  Wind and solar radiation	5
Unit II		
	ly and seasonal variation of wind speed, cyclone, anticyclone, land breeze	
	f solar radiation, solar constant, depletion of solar radiation, short wave	e, longwave and
thermal radiation, net rad	liation, albedo.	
Unit III	Atmospheric temperature and concepts of saturation	6
Atmospheric temperature	e, temperature inversion, lapse rate, daily and seasonal variations of temp	erature, vertical
	Energy balance of earth; Atmospheric humidity, concept of saturation,	
	formation of dew, fog, mist, frost, cloud; Precipitation, process of precip	pitation, types of
precipitation such as rain		
Unit IV	Cloud formation	3
Cloud formation and clas agriculture.	ssification; Artificial rainmaking. Monsoon- mechanism and importance in	n Indian
Unit V	Climate change	6
Weather hazards - drough	ht, floods, frost, tropical cyclones and extreme weather conditions such a	as heat-wave and
	and weather relations; Modifications of crop microclimate, climatic norm	
livestock production.We	ather forecasting- types of weather forecast and their uses. Climate	change, climatic
	ng, causes of climate change and its impact on regional and national	
Agriculture.

### **SEMESTER 2**

AG3206	Title: Agriculture Microbiology	LTPC 2002
Version No.	1.0	2 0 0 2
Course	Nil	
Prerequisites		
Objectives	To familiarize with various microbes and their effect on plants and to demonstrate the indispensable role of microbes in the environment including elemental cycles, biodegradation, etc.	
Unit Nos.	Unit Title	Number of hours (per Unit)
Unit I	Introduction	3
Introduction. Microb	ial world: Prokaryotic and eukaryotic microbes.	·
Unit II	Bacteria	6
	re, chemoautotrophy, photo autotrophy, growth. Bacterial genetics: Genetic agation and transduction, plasmids, transposon.	recombination-
Unit III	Biogeochemical Cycles	5
Role of microbes in s	soil fertility and crop production: Carbon, Nitrogen, Phosphorus and Sulphu	r cycles.
Unit IV	Microbial Interactions	5
Biological nitrogen to Rhizosphere and phy	fixation- symbiotic, associative and asymbiotic. Azolla, blue green algae and llosphere	d mycorrhiza.
Unit V	Microbes in human welfare	5
Microbes in human v biodegradation of ag	velfare: silage production, biofertilizers, biopesticides, biofuel production areo-waste.	nd
Text Books	1. Biswas, T.D. and Mukherjee. Text Book of Soil Sciences. S.K. Tata More Publishing Company Limited, NewDelhi.     2. Mukherjee, N. and Ghosh T. Agricultural Microbiology. Kalyani Publishers.	
Reference Books	<ol> <li>Pelczar, Jr. Michel J. Chan, E.C.S. and Krieg, Noel R. Microbiology. T. Edition.India.</li> <li>Rangaswami, G. and Bagyaraj. D.J. Agricultural Microbiology. Prentice Pvt. Limited, NewDelhi.</li> </ol>	
Mode of Evaluation	Internal and External Examination	
Recommended by the Board of Studies on	31-03-2018	
Date of approval by the Academic Council	11.06.2018	

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use , for more than One)
CO1	Students will gain the knowledge on basics and importance of Microbiology, characterization of microbes along with microbial structure		Emp
CO2	Students will understand the structure and function of various organelles in microbes with their nature of gene transfer		Emp
CO3	Students will understand about the biogeochemical cycles of carbon, nitrogen, phosphorus, and Sulphur, and the influence of human activities		Emp
CO4	Students will be able to understand the beneficial effects of interactions of microbes and plants and mechanism of biological nitrogen fixation.		Emp, Ent
CO5	Students will be able to understand the applications of microbes in human welfare for sustainability	3	Emp, Ent

Version No.	1.0	
<b>Course Prerequisites</b>	Nil	
Objectives	To provide complete set of production technology including quality of seedlings and potted plants of summer and winter vegetables	
Unit Nos.	Unit Title	Number of hours (per Unit)
Unit I	Introduction of vegetable	4
· ·	ables. Importance of vegetables & spices in human nutrition and national economic	-
Unit II	Transplanting Method	5
		gation, weed
Unit III	Physiological disorder in spices	5
	rs of important vegetable and spices (Tomato, Brinjal, Chilli, Caps ourds, Pumpkin, French bean, Peas).	icum,
Unit IV	Physiological disorder in cole crops	6
	r in Cole crops such as Cabbage, Cauliflower, Knol-khol; Bulb crops set as Carrot, Raddish, Beetroot; Tuber crops such as Potato; Leafy vegennial vegetables).	
Unit V	Cultivation Practices	4
	roduction of major vegetable like Potato, Brinjal, chillies, tomato, Cauliflo Musk melon, watermelon, Okra, Radish, Carrot and Pea.	wer, Cabbage
Text Books	1.VishnuSwarup. Vegetable Science and Technology in India .     2.S.P.Singh,NepalSingh,D.K. Singh. VegetableSeedProductionTechnolog	gy.
Reference Books	1. T.K.Bose & J. Kabir. Vegetable Crops. Volume I 2. T.K.Bose , J. Kabir & Others.Vegetable Crops. Volume II 3. T.K.Bose , J. Kabir & Others.Vegetable Crops. Volume III	
Mode of Evaluation	Internal and External Examination	
Recommended by the Board of Studies on	31-03-2018	
Date of approval by the Academic Council	11.06.2018	

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use, for more than One)
CO1	To impart knowledge on the principles of horticulture, propagation and production techniques of tropical, sub tropical, temperate vegetable and spice crops.		Emp, S, Ent
CO2	Students will understand the current applications of vegetable principles and practices: propagation, pest management, production, maintenance, and business practices.		Emp, S, Ent
CO3	Students will be able to solve problems and think critically using new knowledge and technological developments in vegetable and spices.		Emp, S, Ent
CO4	Students will know about the characteristics of the environment and their influence on plant growth and development		Emp, S, Ent
CO5	Students will know about the demonstrate an awareness of diversity within the profession of horticulture and the interplay between horticulture and society in a diverse world through understanding the breadth of diversity (gender, race, culture, religion, etc.); understanding the value of diversity; and knowing how to successfully integrate diverse thought, etc. into the work environment.	3	Emp, S, Ent

<b>Course Prerequisites</b>	Nil	
Objectives	This subject will provide knowledge and understanding of the	
	molecular machinery of living cells and the principles and basic	
TI . M NI	mechanisms of metabolic controland molecular signaling.	N. I. C.
Unit Nos.	Unit Title	Number of
		hours (per Unit)
Unit I	Basic Chemistry and biology	5
Importance of Biocl	hemistry. Properties of Water, pH and Buffer.Carbohydrate: Imp	ortance and
	s of Monosaccharides, Reducing and oxidizing properties of Mon	
	e of Disaccharides and Polysaccharides. Lipid: Importance and classification	n; Structures
	acids; storage lipids and membrane lipids.	
Unit II	Protien and Enzyme	5
	of proteins and classification; Structures, titration and zwitterions nature of a	
	n of proteins. Enzymes: General properties; Classification; Mechanism	n of action;
	nd Line Weaver Burk equation & plots; Introduction to allosteric enzymes.	I 5
Unit III	Biosynthetic pathway	5
	ance and classification; Structure of Nucleotides, A, B & Z DNA; RNA	
	structure. Metabolism of carbohydrates: Glycolysis, TCA cycle, Glyc	exylate cycle,
Electron transport chair		
	n. Metabolism of lipids: Beta oxidation, Biosynthesis of fatty acids.

AG3240	Title: Agriculture Microbiology Lab	LTP C 0 0 21
Version No.	1.0	
<b>Course Prerequisites</b>	Nil	
Objectives	To familiarize with various microbes and their morphology.	
1	T.A	

#### **List of Experiments**

(Perform any Seven)

- 1. Introduction to microbiology laboratory and itsequipments.
- 2. Microscope- parts, principles of microscopy, resolving power and numerical aperture.
- 3. Methods ofsterilization.
- 4. Nutritional media and their preparations.
- 5. Enumeration of microbial population in soil- bacteria, fungi, actinomycetes.
- 6. Methods of isolation and purification of microbialcultures.
- 7. Isolation of Rhizobium from legume rootnodule.
- 8. Isolation of Azotobacter fromsoil.
- 9. Isolation of Azospirillum fromroots.
- 10. Isolation of BGA.
- 11. Staining and microscopic examination of microbes.

AG3241	Title: Fundamentals of Agriculture Extension Education Lab	LTP C 0 0 21
Version No.	1.0	
<b>Course Prerequisites</b>	Nil	
Objectives	To provide the extension education is the overall development of the rural people.	
	T'ut «CEthe	

#### **List of Experiments**

(Perform any Seven)

- 1. To get acquainted with university extension system. Group discussion-exercise;
- 2. Handling and use of audio visual equipments and digital camera and LCD projector; preparation and use of AVaids,
- 3. Preparation of extension literature leaflet, booklet, folder, pamphlet news stories and successstories;
- 4. Presentation skills exercise; micro teaching exercise; A visit to village to understand the problems being encountered by the villagers/ farmers;
- 5. To study organization and functioning of DRDA and other development departments at districtlevel;
- 6. Visit to NGO and learning from their experience in rural development; understanding PRA techniques and their application in village developmentplanning;
- 7. Exposure to mass media: visit to community radio and television studio for understanding the process of programmeproduction

8. Script writing, writing for print and electronic media, developing script for radio andtelevision.

#### **Course Outcome For AG3241**

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use , for more than One)
CO1	Students will be able to apply new trends in agricultural extension like private extension, market led extension, expert systems, farmer led extension and cyber extension		Emp
CO2	Students will able to develop and prepare extension literature such as leaflets, booklets, etc.	3	Emp,S
CO3	Students will be developing their presentation skills exercise while visiting farmers field	3	Emp, S
CO4	Students will be able to learn about different organizational setup of DRDA and other departments at district level.	2	Emp
CO5	Students will be able to apply communication strategies using agricultural journalism for innovation, diffusion and adoption of agricultural technology.		Emp, S, Ent

BSc Agriculture V 2018

AG3242	Title: Fundamental of Crop Physiology Lab	LTPC 0 0 21					
Version No.	1.0						
<b>Course Prerequisites</b>	Nil						
Objectives	Students will study the processes and functions of the crops at cellular, sub-cellular and whole plant levels in response to environmental variables and growth.						
List of Experiments							

(Perform any Seven)

- 1. Study of plantcells.
- 2. Experiments on diffusion, osmosis and imbibitions.
- 3. Determination of transpiration rate byphotometers.
- 4. Extraction of photosynthetic pigments, separation of chlorophyll "a" and "b" and carotenoides.
- 5. Experiments on factors affecting rate of photosynthesis (CO, light andtemperature).
- 6. Determination of photosynthetic and respiration rates through portable CO2 gasanalyzer.
- 7. Separation of photosynthetic pigments through paperchromatography.
- 8. Estimation of relative watercontent.

Mode of Evaluation	Internal and External Examinations
Recommendation by	31-03-2018

#### **Course Outcome for AG3242**

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use, for more than One)
CO1	At the end of the subject, student will collect the knowledge about the structure of cell and cell division.	2	Emp
CO2	At the end of the subject students will be able to know about the Photosynthesis process & learn to determine the rate of photosynthesis and respiration.		Emp
CO3	At the end of the subject students will learn about the metabolic process in plants i.e, osmosis, diffusion, transpiration.		Emp
CO4	By the end of this course students will be able to describe and distinguish role of hormones in plants	2	Emp
CO5	By the end of this course students will be able to distinguish different plants on the basis of their appearance & about their physiological activity.		Emp, S

AG3243	Title: Fundamentals of Entomology Lab	LTP C 0 0 21
Version No.	1.0	
<b>Course Prerequisites</b>	Nil	
Objectives	To study about the way beneficial insects contributes to the well being of humans, animals, and plants.	

#### **List of Experiments**

#### (Perform any Seven)

- 1. Methods of collection and preservation of insects including immaturestages.
- 2. External features of Grasshopper/Blister beetle; Types of insect antennae, mouthparts andlegs.
- 3. Wing venation, types of wings and wing coupling apparatus.
- 4. Types of insect larvae and pupae; Dissection of digestive system in insects(Grasshopper).
- 5. Dissection of male and female reproductive systems in insects(Grasshopper).
- 6. Study of characters of orders Orthoptera, Dictyoptera, Odonata, Isoptera, Thysanoptera, Hemiptera, Lepidoptera, Neuroptera, Coleoptera, Hymenoptera, Diptera and their families of agricultural importance. Insecticides and theirformulations.
- 7. Pesticide appliances and theirmaintenance.
- 8. Sampling techniques for estimation of insect population anddamage.
- 9. Pesticide appliances and theirmaintenance.

10. Sampling techniques for estimation of insect population anddamage.

### **List of Experiments**

(Perform any Seven)

- 1. Preparation of solution, pH &buffers.
- 2. Qualitative tests of carbohydrates and aminoacids.
- 3. Quantitative estimation of glucose/proteins.
- 4. Titration methods for estimation of aminoacids/lipids.
- 5. Effect of pH, temperature and substrate concentration on enzymeaction.
- 6. Paper chromatography/ TLC demonstration for separation of amino acids/Monosaccharides.
- 7. Sterilizationtechniques.
- 8. Composition of various tissue culturemedia
- 9. Preparation of stock solutions for MS nutrientmedium.
- 10. Callus induction from various explants.
- 11. Micro-propagation, hardening and acclimatization.
- 12. Demonstration on isolation of DNA.
- 13. Demonstration of gel electrophoresis techniques and DNA fingerprinting

CY3305	Title: Environmental Studies	L T P C 2 0 0 2
Version No.	1.0	
Course Prerequisites	Nil	
Objectives	Creating awareness among agriculture students about the importance of environment, the effect of technology on the environment and ecological balance is the prime aim of the course.	
Unit No.	Unit Title	No. of hours (per Unit)
Unit I	Introduction to Environmental studies and Ecosystems	5

Multidisciplinary nature of environmental studies, Scope and importance, Need for public awareness.

Concept of an ecosystem-Structure and function of an ecosystem, Energy flow in an ecosystem: food chains, food webs and ecological pyramids, Ecological succession, Case studies of the following ecosystems:

- a) Forest ecosystem
- b) Grassland ecosystem
- c) Desert ecosystem
- d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

#### Unit II Natural Resources: Renewable and Non- renewable resources 5

Land resources and land use change: Land as a resource, land degradation, landslides (natural & man-induced), soil erosion and desertification. Forests & forest resources: Use and over-exploitation, deforestation, case studies. Impacts of deforestation, mining, dam building on environment, forests, biodiversity and tribal populations. Resettlement and rehabilitation of project affected persons; problems and concerns, case studies. Water resources: Use and over-exploitation of surface and ground water, floods, drought, conflicts over water (international & inter-state).

Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies. Energy resources: Renewable and non renewable energy sources, use of alternate energy sources, growing energy needs, case studies.

### Unit III Biodiversity and Conservation 5

Levels of biological diversity: genetic, species and ecosystem diversity. Biogeographic zones of India. Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational values. Biodiversity patterns and global biodiversity hot spots. India as a mega-biodiversity nation; Endangered and endemic species of India. Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions. Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

### Unit IV Environmental Pollution 4

Environmental pollution and its types. Causes, effects and control measures of : a) Air pollution, b) Water pollution – freshwater and marine, c) Soil pollution, d) Noise pollution, e) Thermal pollution. Nuclear hazards and human health risks. Solid waste management: Control measures of urban and industrial waste. Role of an individual in prevention of pollution. Pollution case studies.

# Unit V Environmental Policies and Practices 5

Environmental ethics; issues and possible solutions. Climate change, global warning: causes, effects and mitigation (national and international efforts). Ozone layer depletion: causes, effects and mitigation (national and international). Sustainable Development: Definition, concepts and currencies. Sustainable development of agro-ecosystem (organic farming), Sericulture, floriculture, bee keeping, Sustainable development of hydroenergy in Uttaranchal, Traditional Ecological knowledge (TEK).

Anthropogenic and natural environmental problems. Environmental Protection Act 1986, Air (Prevention and Control of pollution) Act, Water (Prevention and control of Pollution) Act, Wildlife Protection Act 1972, Forest Conservation Act 1980, The Biological Diversity Act 2002, Issues involved in enforcement of environmental legislation, public awareness, Article 48A and 51A, Automobile Emission standards (Eco/Bharat), Ecomark.

AG3308	Title: Fundamentals of Soil Science	LTPC						
		2 0 0 2						
Version No.	1.0							
Course	Nil							
Prerequisites								
Objectives	To study the <i>fundamental</i> concepts in <i>soil science</i>							
Unit No.	Unit Title	No. of						
		hours						
		(per Unit)						
Unit I	Soil formation & components	5						
	dy, Pedological and edaphological concepts of soil; Soil genesis: soil form	ing rocks and						
	processes and factors of soil formation; Soil Profile, components of soil.							
Unit II	Soil physical properties & taxonomy	5						
	ties: soil-texture, structure, density and porosity, soil colour, consistence							
,	ge of soil taxonomy classification and soils of India; Soil water retention, r	novement and						
availability.								
Unit III	Soil chemical properties &soil colloids	6						
	gaseous exchange, problem and plant growth, Soil temperature; source, amou							
	plant growth, Soil reaction-pH, soil acidity and alkalinity, buffering, effect of							
	ids - inorganic and organic; silicate clays: constitution and properties; sources	of charge; ion						
Unit IV	nange capacity, base saturation.	1						
	Soil organic matter composition, properties and its influence on soil properties; humic substances	4						
	isms, Macro and micro organisms, their beneficial and harmful effects.	s - nature and						
Unit V	Soil pollution	4						
Soil pollution - behav	riour of pesticides and inorganic contaminants, prevention and mitigation of soil J	pollution.

AG3309	Title: Agricultural Marketing Trade & Finance and Co-operation	LTPC
		2 0 0 2
Version No.	1.0	
Course	Nil	
Prerequisites		
Objectives	To understand the Structure of Agriculture marketing in India.	
Unit No.	Unit Title	No. of
		hours
		(per Unit)
Unit I	Agriculture Marketing	4

Agricultural Marketing: Concepts and definitions of market, marketing, agricultural marketing, market structure, marketing mix and market segmentation, classification and characteristics of agricultural markets; demand, supply and producers surplus of agri-commodities: nature and determinants of demand and supply of farm products, producers surplus meaning and its types, marketable and marketed surplus, factors affecting marketable surplus of agri-commodities.

#### Unit II Product Life cycle and Competitive Strategies

5

Product life cycle (PLC) and competitive strategies: Meaning and stages in PLC; characteristics of PLC; strategies in different stages of PLC; pricing and promotion strategies: pricing considerations and approaches – cost based and competition based pricing; market promotion advertising, personal selling, sales promotion and publicity – their meaning and merits & demerits; marketing process and functions.

#### Unit III Marketing Process

5

Marketing process-concentration, dispersion and equalization; exchange functions buying and selling; physical functions storage, transport and processing; facilitating functions packaging, branding, grading, quality control and labeling (Agmark).

### **Unit IV** Market Functionaries and Marketing Channels

5

Market functionaries and marketing channels: Types and importance of agencies involved in agricultural marketing; meaning and definition of marketing channel; number of channel levels; marketing channels for different farm products; Integration, efficiency, costs and price spread: Meaning, definition and types of market integration; marketing efficiency; marketing costs, margins and price spread; factors affecting cost of marketing; reasons for higher marketing costs of farm commodities; ways of reducing marketing costs; Role of Govt. in agricultural marketing.

#### Unit Public sector and Agricultural Prices and Policy

5

Public sector institutions- CWC, SWC, FCI, CACP & DMI – their objectives and functions; cooperative marketing in India; Risk in marketing: Types of risk in marketing; speculation & hedging; an overview of futures trading; Agricultural prices and policy: Meaning and functions of price; administered prices; need for agricultural price policy; Trade: Concept of International Trade and its need, theories of absolute and comparative advantage. Present status and prospects of international trade in agri-commodities; GATT and WTO; Agreement on Agriculture (AoA) and its implications on Indian agriculture.

1. Agricultural Marketing Trade and Prices. TNAU
2. James Vercammen. Agricultural Marketing. Taylor & Francis Ltd (Sales)
1. Munish Alagh. Agricultural Prices in a Changing Economy: an Empirical Study of Indian
Agriculture Hardcover. UBSPD.
2.Kallummal Murali. Measures and Market Access Implications for Agricultural Trade. Repro
Books-On-Demand.
Internal and External Examination

AG3313	Title: Introduction to Forestry	LTPC						
		1 0 0 1						
Version No.	1.0							
Course	Nil							
Prerequisites								
Objectives	To study the fundamentals behind the management of natural forests comes by way of natural ecology.							
Unit No.	Unit Title	No. of hours (per Unit)						
Unit I	Introduction	2						
Introduction – definit	tions of basic terms related to forestry, objectives of silviculture, forest classifi	cation, salient						
features of Indian For		,						
Unit II	Regeneration	3						
Forest regeneration,	Natural regeneration -natural regeneration from seed and vegetative par	ts, coppicing,						
	ers; Artificial regeneration - objectives, choice between natural and artificial							
essential preliminary	considerations.							
Unit III	Crown classification	2						
Crown classification.	Tending operations – weeding, cleaning, thinning –mechanical, ordinary, crown	n and advance						
thinning.								
Unit IV	Forest Mensuration	4						
instrumental methods measurement - geom	<ul> <li>objectives, diameter measurement, instruments used in diameter measurements of height measurement - shadow and single pole method; Instrumental methetric and trigonometric principles, instruments used in height measurement; trutient, measurement of volume of felled and standing trees, age determination of the standing trees.</li> </ul>	nods of height ee stem form,						
Unit V	Agroforestry	3						
Agroforestry – defini prevalent in the coun Cultivation practices	tions, importance, criteria of selection of trees in agroforestry, different agrofo try; shifting cultivation, taungya, alley cropping, wind breaks and shelter belts, of two important fast growing tree species of the region.	home gardens.

an	Students will have hands on experience and perform laboratory work in identifying and analyzing different environmental problems related with air, water pollution, and environmental degradation.				

#### **List of Experiments**

### (Perform any seven experiments)

- 1. Determination of alkalinity of the supplied water sample
- 2. Determination of temporary and permanent hardness of water using EDTA (Disodium salt of ethylene– diamine tetra acetic acid)
- 3. Determination of dissolved oxygen in the given sample of water
- 4. Determination of BOD (Biological Oxygen Demand) in water
- 5. Determination of COD (Chemical Oxygen demand in water) in water
- 6. Determination of pH, Conductivity and turbidity in some drinking water sample and preparation of report
- 7. Determination of Total dissolved solids in water / effluent sample
- 8. Documentation of natural resources in local area (river, forest, lake and pond)
- 9. Study of common plants, birds and mammals in local area
- 10. Report on visit to National Parks
- 11. Report on visit to local polluted sites

AG3341	Title:Fundamentals of Plant Pathology Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	Nil	
Objectives	To study the nature, causes and prevention/protection of <i>plant diseases</i> .  To study on minimization of the <i>crop</i> losses through adaption <i>principles</i> of disease prevention.	
	List of Experiments	

#### (Perform any Seven Experiments)

- 1. Acquaintance with various laboratory equipments and microscopy.
- 2. Collection and preservation of disease specimen.
- 3. Preparation of media, isolation and Koch's postulates.
- 4. General study of different structures of fungi.
- 5. Study of symptoms of various plant diseases.
- 6. Study of representative fungal genera
- 7. Staining and identification of plant pathogenic bacteria.
- 8. Study of phanerogamic plant parasites and transmission of plant viruses.
- 9. Study of morphological features and identification of plant parasitic nematodes.
- 10. Sampling and extraction of nematodes from soil and plant material, preparation of nematode mounting.
- 11. Study of fungicides and their formulations.
- 12. Methods of pesticide application and their safe use.
- 13. Calculation of fungicide sprays concentrations.

Mode of	Internal and External Examination
Evaluation	
Recommendation	31-03-2018
by Board of	
Studies on	
Date of approval	11.06.2018
by the Academic	
Council	

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use , for more than One)		
	Students would learn about compound microscope and its different components & different laboratory equipment's and their principle and uses, isolation of the fungal plant pathogens from affected plant parts (leaf) and prove Koch' postulates		Emp, S		
CO2	Students would learn about the different structures of fungi, symptoms of various plant diseases and also study phanerogamic plant parasites	3	Emp, S, Ent		
CO3	Students would learn about fungicides and their formulations, preparation of fungicidal solutions, slurries and pastes and their applications along with precautions in their handling, sampling and extraction of nematodes from soil and plant material and preparation of nematode mounting	3	Emp		
CO4	Students would learn about the staining of pathogenic bacteria.	3	Emp, S, Ent		
CO5	Students would learn about the identification and transmission of plant virus	3	Emp, S

AG 3342	Title: Fundamentals of Soil Science Lab	L T P C 0 0 2 1						
Version No.	1.0							
<b>Course Prerequisites</b>	Nil							
Objectives	Students will gain knowledge about Soil as a natural body, Pedological and Edaphological concepts of soil. Students will also study about soil sampling tools, collection of representative soil sample, its processing and storage.							
List of Experiments								

### (Perform any seven experiments)

- 1. To study about the soil profile in field
- 2. To study about the soil sampling tools
- 3. To study about the collection of representative soil sample, its processing and storage
- 4. To study about the soil forming rocks and minerals
- 5. To study about the determination of soil density, moisture content and porosity
- 6. To study about the determination of soil texture by feel and Bouyoucos Methods
- 7. To study studies about the capillary rise phenomenon of water in soil column and water movement in soil
- 8. To study determination about the soil pH and electrical conductivity
- 9. To study about the Determination of Cat ion exchange capacity of soil
- 10. To study about the soil map.
- 11. To study about the determination of soil colour.
- 12. To study about the demonstration of heat transfer in soil.
- 13. To study about the estimation of organic matter content of soil.

Mode of Evaluation	Internal and External Examination

AG3343	Title: Agricultural Marketing Trade and Finance and Co-operation Lab	L T P C 0 0 2 1
Version No.	1.0	
Course	Nil	
Prerequisites		
Objectives	To understand the Structure of Agriculture marketing in India.	

#### **List of Experiments**

#### (Perform any seven experiments)

- 1. To study of plotting and study of demand and supply curves and calculation of elasticity
- 2. To study of relationship between market arrivals and prices of some selected commodities
- 3. To study of Computation of marketable and marketed surplus of important commodities
- 4. To Study of price behavior over time for some selected commodities
- 5. To study of Construction of index numbers
- 6. Visit to a local market to study various marketing functions performed by different agencies
- 7. Identification of marketing channels for selected commodity
- 8. Collection of data regarding marketing costs, margins and price spread and presentation of report in the class
- 9. Visit to market institutions NAFED, SWC, CWC, cooperative marketing society, etc. to study their organization and functioning
- 10. To study Application of principles of comparative advantage of international trade

AG3344	Title:Farm Machinery and Power Lab	L T P C 0 0 2 1				
Version No.	1.0					
Course	Nil					
Prerequisites						
Objectives	To study the socio-economic conditions of the farmers and assess their capabilities for acquiring and adopting the needed <i>agricultural equipment</i> /machinery and the uses of farm <i>power</i> , ultimate requirement, ways and means to fulfill the gaps for various farm operations.					
List of Evnoviments						

#### List of Experiments

#### (Perform any seven experiments)

- 1. Study of different components of I.C. engine.
- 2. To study air cleaning and cooling system of engine, Familiarization with clutch, transmission, differential and final drive of a tractor.
- 3. Familiarization with lubrication and fuel supply system of engine, Familiarization with brake, steering, hydraulic control system of engine, Learning of tractor driving.
- 4. Familiarization with operation of power tiller, Implements for hill agriculture.
- 5. Familiarization with different types of primary and secondary tillage implements: mould plough, disc plough and disc harrow.
- 6. Familiarization with seed-cum-fertilizer drills their seed metering mechanism and calibration, planters and transplanter.
- 7. Familiarization with different types of sprayers and dusters.
- 8. Familiarization with different inter-cultivation equipment, Familiarization with harvesting and threshing machinery.

AG3351	Title: Introduction to Forestry Lab	L T P C 0 0 2 1
Version No.	1.0	
<b>Course Prerequisites</b>	Nil	
Objectives	To study the fundamentals behind the management of natural forests comes by way of natural ecology.	

#### **List of Experiments**

#### (Perform any Seven)

- 1. Identification of tree-species.
- 2. Diameter measurements using callipers and tape,
- 3. Height measurement of standing trees by shadow method.
- 4. Height measurement of standing trees by single pole method.
- 5. Height measurement of standing trees at different conditions by Abney's Level.
- 6. Volume measurement of logs using Quarter girth formula.
- 7. Volume measurement of wood by using xylometric principle.
- 8. Visits of nearby forest based industries.

AG3440	Title:Crop Production Technology and Crop Improvement – II (Rabi crops) Lab	L T P C 0 0 2 1					
Version No.	1.0						
Course	Nil						
Prerequisites							
Objectives	To study proven technologies for wheat-legume rotation systems through the scaling out of improved wheat and food legume varieties and associated production technologies, including supplemental irrigation.  To develop stable and high yielding varieties of both food and cash crops.						
List of Experiments							

## (Perform any Seven Experiments)

- Sowing methods of wheat and sugarcane, 1.
- 2. Identification of weeds in rabi season crops,
- 3. Study of morphological characteristics of rabi crops,
- 4. Study of yield contributing characters of *rabi* season crops,
- Yield and juice quality analysis of sugarcane. 5.
- Study of rabi forage experiments, oil extraction of medicinal crops, visit to research stations of related crops 6.
- Floral biology, emasculation and hybridization techniques in different crop species namely Wheat, Oat, 7. Barley, Chickpea, Lentil, Field pea, Rajma, Horse gram, Rapeseed Mustard, Sunflower, Safflower, Potato, Berseem. Sugarcane, Tomato, Chilli, Onion
- Handling of germplasm and segregating populations by different methods like pedigree, bulk and single seed decent methods
- Study of field techniques for seed production and hybrid seeds production in *Rabi* crops 9.
- 10. Estimation of heterosis, inbreeding depression and heritability;
- 11. Study of quality characters, study of donor parents for different characters
- Visit to seed production plots; Visit to AICRP plots of different field crops 12.

Mode of Evaluation	Internal and External Examination

<b>Board of Studies on</b>	
Date of approval by	11.06.2018
the Academic Council	

#### **Course Outcome For AG3441**

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use , for more than One)
CO1	Students would learn the impart knowledge on the economically important insects and principles of insect pest management, including concept and components of IPM		Emp, S
CO2	Student will be able to know about honey bee species, castes of bees	3	Emp, S, Ent
1	Student will be able to know about mulberry cultivation, mulberry varieties and methods of harvesting and preservation of leaves	3	Emp
CO4	Students would learn about types of silkworm, voltinism and biology of silkworm	3	Emp, S, Ent
CO5	Students will visit to research and training institutions devoted to beekeeping, sericulture, lac culture and natural enemies		Emp, S

AG3442	Title: Production Technology for Fruit and Plantation Crops Lab	L T P C			
		0 0 2 1			
Version No.	1.0				
Course	Nil				
Prerequisites					
Objectives	To study about scientific information in solving major problems that limit <i>fruit</i> and plantation crops <i>production</i> and marketing.				
	List of Experiments				
Study of seed pr	ropagation				
2. Scarification and	d stratification of seeds.				
3. Propagation met	thods for fruit and plantation crops.				
4. Description and	identification of fruit.				
5. Preparation of p	lant bio regulators and their uses				
6. Important pests,	diseases and physiological disorders of above fruit and plantation crops.				
7. Visit to commer	reial orchards.				
<b>Mode of Evaluation</b>	Internal and External Examination				
Recommendation 31-03-2018

the Academic					

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use , for more than One)
CO1	Students will be able to understand planting system and morphology of fruit and plantation crops and different forms and external structures of fruit		Emp, S
CO2	Students will be able to get Knowledge of the seed propagation & different methods of seed treatment & the various seed treatment methods for breaking dormancy		Emp, S, Ent
(()3	Students will be able to apply the sexual and asexual propagation techniques in horticulture plants	3	Emp
(()4	Students will be able to understand the role of different bio regulators	3	Emp, S, Ent
	Students will be able to understand the different insect-pests of fruit and plantation crops and their management	3	Emp, S

AG3	443	Title:Manures, Fertilizers and Soil Fertility Management Lab	L T P C				
Vers	ion No.	1.0	0 0 2 1				
	rse Prerequisites	Nil					
Obje	ectives	To impart knowledge of fertilizers and manures as sources of plant					
		nutrients and apprise about the integrated approach of plant nutrition and					
		sustainability of soil fertility.					
		List of Experiments					
1.	Introduction of a	analytical instruments and their principles, calibration and applications, Co	lorimetry and				
	flame photometry	7.					
2.	Estimation of soil	organic carbon, Estimation of alkaline hydrolysable N in soils.					
3.	Estimation of soil	extractable P in soils. Estimation of exchangeable K; Ca and Mg in soils.					
4.	Estimation of soil	extractable S in soils.					
5.	Estimation of DT	PA extractable Zn in soils. Estimation of N in plants. Estimation of P in plants	S.				
6.	Estimation of K i	n plants. Estimation of S in plants.

AG3444	Title: Fundamentals of Horticulture Lab	L T P C 0 0 2 1
Version No.	1.0	
Course Prerequisites	Nil	
Objectives	Students will be exposed to identification of garden tools, horticultural plants. They will be learning to prepare seed bed/nursery bed etc.,	

## **List of Experiments**

## (Perform any seven experiments)

- 1. Identification of garden tools.
- 2. Identification of horticultural crops.
- 3. Preparation of seed bed/nursery bed.
- 4. Practice of sexual and asexual methods of propagation including micro-propagation.
- 5. Layout and planting of orchard.
- 6. Training and pruning of fruit trees.
- 7. Preparation of potting mixture.
- 8. Fertilizer application in different crops.
- 9. Visits to commercial nurseries/orchard

Version No.	1.0							
<b>Course Prerequisites</b>	Nil							
Objectives	To enhance per capita availability of milk, eggs, and meat including <i>poultry</i> .							
	List of Experiments							

#### (Perform any Seven)

- 1. External body parts of cattle, buffalo, sheep, goat, swine and poultry.
- 2. Handling and restraining of livestock. Identification methods of farm animals and poultry.
- 3. Visit to IDF and IPF to study breeds of livestock and poultry and daily routine farm operations and farm records. Judging of cattle, buffalo and poultry.
- 4. Culling of livestock and poultry. Planning and layout of housing for different types of livestock. Computation of rations for livestock.
- 5. Formulation of concentrate mixtures. Clean milk production, milking methods.
- 6. Hatchery operations, incubation and hatching equipments.
- 7. Management of chicks, growers and layers. Debeaking, dusting and vaccination.
- 8. Economics of cattle, buffalo, sheep, goat, swine and poultry production

Version No.	1.0	
Course	Nil	
Prerequisites		
<b>Expected Outcome</b>	Students will be able to market their own products .	

### **List of Experiments**

- 1. Study of agri-input markets: Seed, fertilizers, pesticides
- 2. To Study of output markets: grains, fruits, vegetables, flowers. Study of product markets, retails trade commodity trading, and value added products
- To Study of financing institutions- Cooperative, Commercial banks, RRBs, Agribusiness Finance Limited, NABARD
- 4. Preparations of projects and Feasibility reports for agribusiness entrepreneur
- 5. Appraisal/evaluation techniques of identifying viable project- Non-discounting techniques
- 6. Case study of agro-based industries. Trend and growth rate of prices of agricultural commodities
- 7. Net present worth technique for selection of viable project. Internal rate of return.

AG3506	Title: Problematic Soils and their Management	LTPC
Vousier No	1.0	2 0 0 2
Version No.		
Course Prerequisites	Nil	
Objectives	Students will gain on soil health/quality and distribution of waste land/problematic soils in India and to acquaint with methods reclamation of various problematic soils with respect to plant growth and utilization of saline water in agriculture.	
Unit Nos.	Unit Title	Number of hours (per Unit)
Unit 1	Introduction to Soil and its Problems	4
Soil quality and h	ealth, distribution of waste land and problem soils in India and their categorization based o  Reclamation and Management of different Soil	n properties.
	management of Saline and Sodic soils, Acid soils, Acid Sulphate soils, Eroded and Co	
flooded soils, poll	uted soils inoccurrence classification, formation, diagnosis, characteristics and management	
Unit 3	Irrigation	4
Irrigation water –	quality and standards, utilization of saline water in agriculture.	
Unit 4	Remote Sensing and Land Classification	5
Remote sensing a classification.	nd GIS in diagnosis and management of problem soils. Land capability and classification,	and suitability
Unit 5	Bioremedation	5
Multipurpose tree	species, bio remediation through MPTs of soils. Problematic soils under different Agro-ec	osystems.

G3508	Title:Principles of Integrated Pest and Disease Management	LTPC 1001
Version No.	1.0	
Course Prerequisites	Nil	
Objectives	Students will get familiarized with various categories of pest, understand the strategies and practices of IPM, including biological, cultural, regulatory, mechanical and chemical/bio-pesticidal, pest monitoring, and decision making. based on the symptoms from various pests and recommend the management practices.	
Unit Nos.	Unit Title	Number of hours (per Unit)
Unit 1	Introduction to Integrated Pest Management	2
IPM: Introduction diseases and pest		f insect pests,
Unit 2	Method of Detection	2
	ect pests and diseases.Methods of detection and diagnosis of insect pest and diseases. Comic injury level and importance of Economic threshold level.	alculation and
Unit 3	Control and Management	3
	rol: Host plant resistance, cultural, mechanical, physical, legislative, biological and che gement of crop environment .Introduction to conventional pesticides for the insect pest	
Unit 4	Survey and Forecasting	3
	ance and forecasting of Insect pest and diseases. Development and validation and impact of IPM (IPM module for Insect pest and disease. Safety issues in pestici	
Unit 5	Legal Implication of IPM	2
Political, social a IPM programmes	nd legal implication of IPM. Case histories of important IPM programmes. Case historie	s of important

		1 0 0 1
Version No.	1.0	
Course	Nil	
Prerequisites		
Objectives	The main objective is to identify the insect and mite pests and study about their	
•	symptoms, biology, host range, etc. under field and storage conditions and to study	
	suitable/viable management strategies	
Unit Nos.	Unit Title	Number of
		hours
		(per Unit)
Unit 1	Introduction to Pest	2
	n nature and type of damage by different arthropods pests. Scientific name, order, famil	y, host range,
distribution, biology	y and bionomics, nature of damage.	
Unit 2	Management of Field and Vegetable Crop	2
	ajor pests and scientific name, order, family, host range, distribution, nature of damage	_
	rtant arthropod pests of various field crop, vegetable crop.	, c unu common
F		
Unit 3	Management of Fruit and Plantation Crop	2
Management of ma	ajor pests and scientific name, order, family, host range, distribution, nature of damag	ge and control
practice other impor	rtant arthropod pests of various Fruit crop, Plantation crop.	
Unit 4	Management of Ornamental Crop, Spices and Condiments	2
Management of ma	ajor pests and scientific name, order, family, host range, distribution, nature of damag	ge and control
practice other impor	rtant arthropod pests of various ornamental crops, spices and condiments.	
Unit 5	Storage Management	4
Factors affecting lo	osses of stored grain and role of physical, biological, mechanical and chemical factors in d	eterioration of
	mites, rodents, birds and microorganisms associated with stored grain and their manage	
structure and metho	ds of grain storage and fundamental principles of grain store management.

AG3540	Title:Post-harvest Management and Value Addition of Fruits and Vegetables Lab	LTPC 0 0 2 1
Version No.	1.0	V V 2 1
Course	Nil	
Prerequisites		
Expected	Students will acquire knowledge on post harvest management tools	
Outcome	and novel packaging techniques.	
	List of Experiments	

- 1. Applications of different types of packaging, containers for shelf life extension.
- 2. Effect of temperature on shelf life and quality of produce.
- 3. Demonstration of chilling and freezing injury in vegetables and fruits.
- 4. Extraction and preservation of pulps and juices.
- 5. Preparation of jam, jelly, RTS, nectar, squash, osmotically dried products, fruit bar and candy and tomato products, canned products.
- 6. Quality evaluation of products -- physico-chemical and sensory.
- 7. Visit to processing unit/industry.

AG3541	Title:Principles of Integrated Pest and Disease Management Lab	LTPC
		0 0 2 1
Version No.	1.0	
Course	Nil	
Prerequisites		
Objectives	Students will be familiarized with various categories of pest, understand	
	how IPM decisions are made and factors that influence the decision-	
	making process and to apply knowledge gained to solve actual pest	
	management problems.	
	List of Experiments	

### (Perform any seven experiments)

- 1. Methods of diagnosis and detection of various insect pests, and plant diseases.
- 2. Methods of insect pests and plant disease measurement.
- 3. Assessment of crop yield losses, calculations based on economics of IPM.
- 4. Identification of biocontrol agents, different predators and natural enemies.
- 5. Mass multiplication of *Trichoderma*, *Pseudomonas*, *Trichogramma*, NPV etc.
- 6. Identification and nature of damage of important insect pests and diseases and their management.
- 7. Crop (agro-ecosystem) dynamics of a selected insect pest and diseases.
- 8. Plan & assess preventive strategies (IPM module) and decision making crop monitoring attacked by insect, pest and diseases.
- 9. Awareness campaign at farmers fields.

AG3542	Title:Pests of Crops and Stored Grains and their Management Lab	LTPC
		0 0 2 1
Version No.	1.0	
Course	Nil	
Prerequisites		
Objectives	The main objective is to identify the insect and mite pests and study about their	
	symptoms, biology, host range, etc. under field and storage conditions and to study	
	suitable/viable management strategies	
	List of Experiments	

### (Perform any seven experiments)

- 1. Identification of different types of damage caused by pest and insect.
- 2. Identification and study of life cycle and seasonal history of various insect pests attacking crops and their produce: (a) Field Crops; (b) Vegetable Crops; (c) Fruit Crops; (d) Plantation, gardens, Narcotics, spices & condiments.
- 3. Identification of insect pests and Mites associated with stored grain.
- 4. Determination of insect infestation by different methods. Assessment of losses due to insects.
- 5. Calculations on the doses of insecticides application technique. Fumigation of grain store / godown. Identification of rodents and rodent control operations in godowns.
- 6. Identification of birds and bird control operations in godowns.
- 7. Determination of moisture content of grain.
- 8. Methods of grain sampling under storage condition.
- 9. Visit to Indian Storage Management and Research Institute, Hapur and Quality Laboratory, Department of Food., Delhi. Visit to nearest FCI godowns.

		0 0 2 1
Version No.	1.0	
Course	Nil	
Prerequisites		
Objectives	Students will be able to understand the concepts of seed science and technology	
	and impart training for entrepreneurship in commercial seed production of	
	various crops.	
	List of Experiments	

### (Perform any seven experiments)

- 1. Seed production in major cereals: Wheat, Rice, Maize, Sorghum, Bajra and Ragi.
- 2. Seed production in major pulses: Urd, Mung, Pigeonpea, Lentil, Gram, Field bean, pea.
- 3. Seed production in major oilseeds: Soybean, Sunflower, Rapeseed, Groundnut and Mustard.
- 4. Seed production in important vegetable crops.
- 5. Seed sampling and testing: Physical purity, germination, viability, etc.
- 6. Seed and seedling vigour test.
- 7. Genetic purity test:
- 8. Grow out test and electrophoresis.
- 9. Seed certification: Procedure, Field inspection, Preparation of field inspection report.
- 10. Visit to seed production farms, seed testing laboratories and seed processing plant.

AG3545	Title:Rainfed Agriculture and Watershed Management Lab	LTPC 0 021
Version No.	1.0	
Course Prerequisites	Nil	
Objectives	Students will be learning about soil and water conservation techniques, to manage crops in rainfed areas and to demonstrate soil moisture conservation and water harvesting structures.	
	List of Experiments	

(Perform any seven experiments)

- 1. Studies on climate classification
- 2. Studies on rainfall pattern in rainfed areas of the country and pattern of onset and withdrawal of monsoons.
- 3. Studies on cropping pattern of different rainfed areas in the country and demarcation of rainfed area on map of India
- 4. Interpretation of meteorological data and scheduling of supplemental irrigation on the basis of evapotranspiration demand of crops.
- 5. Critical analysis of rainfall and possible drought period in the country, effective rainfall and its calculation.
- 6. Studies on cultural practices for mitigating moisture stress.
- 7. Characterization and delineation of model watershed.
- 8. Field demonstration on soil & moisture conservation measures.
- 9. Field demonstration on construction of water harvesting structures.

10. Visit to rainfed research station/watershed

AG3548	Title: Protected Cultivation and Secondary Agriculture Lab	LTPC
		0 0 2 1
Version No.	1.0	
Course	Nil	
Prerequisites		
Objectives	Students will be learning about protected agriculture techniques, Planning and design of greenhouses, Important Engineering properties such as physical, thermal and aero & hydrodynamic properties of cereals, pulses and oilseed, their application in PHT equipment design and operation.	
	List of Experiments	

(Perform any seven experiments)

- 1. Study of different type of green houses based on shape.
- 2. Determine the rate of air exchange in an active summer winter cooling system.
- 3. Determination of drying rate of agricultural products inside green house.
- 4. Study of green house equipments.
- 5. Visit to various Post Harvest Laboratories.
- 6. Determination of Moisture content of various grains by oven drying & infrared moisture methods.
- 7. Determination of engineering properties (shape and size, bulk density and porosity of biomaterials).
- 8. Determination of Moisture content of various grains by moisture meter.
- 9. Field visit to seed processing plant.

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use , for more than One)
1 (1)	Students will able to understand the concepts, scope and importance of Agricultural economics	2	Emp
1 (1)	Students will understand the framework about consumer behavior, producer behavior and analyzing consumer- producer decisions.	3	Emp, S
CO3	Students will understand the role-played by cost and revenue in long run and short run-in different market structure and thus direct firms and industries for minimization of cost and maximization of revenue.		Emp, S
	Students will be able to understand macroeconomic concepts like National economy, population, money, inflation and deflation.	3	Emp, S
	Students will understand the banking system and credit policies and practices	3	Emp, S

Subject Code: AG3605	Title: Geoinformatics and Nanotechnology and Precision Farming	L T P C 1 0 0 1
Version No.	1.0	
Course Prerequisites		
Objectives	To acquaint with GIS software, data creation and editing.	
	To familiarize with the concepts of precision farming	
Unit No.	Unit Title	No. of hours (per Unit)
Unit I	Precision agriculture	5
	re: concepts and techniques; their issues and concerns for Indian agriculture; tool and techniques; their use in Precision Agriculture.	Geo-informatics-
Unit II	Application of Technologies	6
Spatial data and the and interpretation.	n and Yield monitoring, soil mapping; fertilizer recommendation using geospir management in GIS; Remote sensing concepts and application in agriculture;	Image processing
Unit III	Global positioning system	5
	system (GPS), components and its functions; Introduction to crop Simulation Mo Agricultural Inputs; STCR approach for precision agriculture.	dels and their uses
Unit IV	Nanotechnology	5
	efinition, concepts and techniques, brief introduction about nanoscale effects, narilizers, nano-sensors, Use of nanotechnology in seed.	no-particles, nano-
Unit V	Farm Productivity	3
Water, fertilizer, pla	nt protection for scaling-up farm productivity.	
Text Books	<ol> <li>The Essentials:Understanding Nanoscience and Nanotechnolgy. Pr NANO: Tata McGraw-Hill Publishing Company Limited, New Delhi</li> <li>Text book of Remote sensing and Geographical Information Systen Anji Reddy, M. 2006. B.S. Publications, Hyderabad</li> </ol>	ns, (3rd edition).
Reference Books	<ol> <li>Remote sensing and image interpretation. Lillesand, T.M. and Kiefer, F.</li> <li>Precision Farming-Soil Fertility and Productive K. R. Krishna. Apple Acdemic Press.</li> </ol>	
Mode of Evaluation	Internal and External Examinations	
Recommendatio n by Board of Studies on	31-03-2018	
Date of approval by the Academic Council	11.06.2018	

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use , for more than One)
CO1	Student would learn about precision agriculture and Geo- informatics- their uses in Precision Agriculture	3	Emp, S
CO2	Student would learn about crop discrimination and yield monitoring, soil mapping; fertilizer recommendation using geospatial technologies; Spatial data and their management in GIS; Remote sensing concepts and application in agriculture; Image processing and interpretation		Emp, S
CO3	Student would learn about Global positioning system (GPS), components and its functions; crop Simulation Models and their uses for optimization of Agricultural Inputs; STCR approach for precision agriculture		Emp, S,Ent
CO4	Student would learn about nanotechnology- definition, concepts and techniques, nano scale effects, nano-particles, nanopesticides, nano-fertilizers, nano-sensors		Emp, S,Ent
CO5	Student would learn about use of nanotechnology in seed, water, fertilizer, plant protection for scaling-up farm productivity	3	Emp, S

Version No.	1.0	1 0 0 1
Course		
Prerequisites		
Objectives	To familiarize with different forms of bio-energy sources and their contribution in agricultural sectors	
Unit No.	Unit Title	No. of hours (per Unit)
Unit I	Classification	3
Classification of en	ergy sources, contribution of these of sources in agricultural sector.	
Unit II	Biomass	4
Familiarization with	1 biomass utilization for biofuel production and their application.	
Unit III	Natural Bioenergy Sources	6
	h types of biogas plants and gasifiers, biogas, bio alcohol, biodiesel and bio oilproduergy resource, introduction of solar energy, collectionand their application.	ction and their
Unit IV	Solar Energy	7
	h solar energy gadgets: solar cooker, solar water heater, application of solar energy stillation, solar photovoltaic systemand their application.	solar drying,
Unit V	Wind Energy	4
Introduction of win	d energy and their application.	
Text Books	1. Non-conventional Energy Sources. Rai, G.D. 2004. Khanna Publishers, New Del 2. Non-conventional Energy Sources. Raiput, R. K. 2012. S. Chand Publishers.	hi.

		0 0 2 1
Version No.	1.0	
Course	Nil	
Prerequisites		
Objectives	Students will be familiarized to different crop simulation models, use of	
	DBMS in agriculture; will gain awareness on smart phone mobile apps	
	in agriculture and application of decision support system in agriculture.	
	List of Experiments	

#### (Perform any Seven Experiments)

- 1. Study of Computer Components, accessories, practice of important DOS Commands.
- 2. Introduction of different operating systems such as windows, Unix/ Linux, Creating, Files & Folders, File Management.
- 3. Use of MS-WORD and MS Power-point for creating, editing and presenting a scientific Document.
- 4. MS-EXCEL Creating a spreadsheet, use of statistical tools, writing expressions, creating graphs, analysis of scientific data.
- 5. MS-ACCESS: Creating Database, preparing queries and reports, demonstration of Agriinformation system.
- 6. Introduction to World Wide Web (WWW).
- 7. Introduction of programming languages.
- 8. Hands on Crop Simulation Models (CSM) such as DSSAT/Crop-Info/CropSyst/ Wofost;
- 9. Computation of water and nutrient requirements of crop using CSM and IT tools.
- 10. Introduction of Geospatial Technology for generating valuable information for Agriculture.
- 11. Hands on Decision Support System.
- 12. Preparation of contingent crop planning.

CO2	Students would learn about visual and digital interpretation of remote sensing images	3	Emp, S
CO3	Students would learn to generate spectral profiles of different objects	3	Emp, S
CO4	Students would learn about supervised and unsupervised classification and acreage estimation	3	Emp, S
CO5	Student would learn about fertilizers recommendations based on VRT and STCR techniques and also learn about formulation, characterization and applications of nanoparticles in agriculture	3	Emp, S

AG3645	Title: Renewable Energy and Green Technology Lab	L T P C 0 0 21
Version No.	1.0	
Course		
Prerequisites		
Objectives	To teach about gasifier, bio-fuel, solar light, solar pumping, solar fencing, solar drying, etc.	
	List of Evansiments	

#### **List of Experiments**

(Perform any Seven)

- 1. Familiarization with renewable energy gadgets.
- 2. To study biogas plants,
- 3. To study gasifier
- 4. To study the production process of biodiesel
- 5. To study briquetting machine
- 6. To study the production
- 7. To study process of bio-fuels
- 8. Familiarization with different solar energy gadgets
- 9. To study solar photovoltaic system: solar light, solar pumping, solar fencing.
- 10. To study solar cooker
- 11. To study solar drying system
- 12. To study solar distillation and solar pond

	ation and solar pond									
<b>Mode of Evaluation</b>	Internal and External Examinations									
Recommendation	31-03-2018									
by Board of Studies										
on										
Date of approval by	11.06.2018									
the Academic										
Council										

Unit-wise Course Outcome	Descriptions	BL Level	Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use , for more than One)
CO1	To understand the role of renewable sources in agriculture sector	3	Emp, S
CO2	To understand the bio fuel production and their applications in today's world	3	Emp, S
соз	To understand and utilizing the solar energy in various aspects	3	Emp, S
CO4	Students will have Basic Knowledge about biogas plants	3	Emp, S,Ent
CO5	Students will gain the knowledge about the process of bio-fuels	3	Emp, S
